

***e-snaps* Outage**

HUD will begin updating *e-snaps* at 7:00 PM EDT tonight (Thursday, August 25th)

The update process will cause *e-snaps* to be available intermittently between tonight and Monday morning (August 29th). This means that *e-snaps* users should **not** enter any data into *e-snaps* while the software is being updated because the data entered between 7:00 PM tonight and Monday morning may not be saved by the system.

HUD will notify users via a listserv message after the software update process is completed. The Department apologizes for any inconvenience caused by this *e-snaps* outage.
